

IMPACT STORY OF THE MONTH

Ms. Thai Thi Bao Tran is an alumna from the Faculty of Industrial Electronics (2018-2021) of LILAMA2 College and currently a teacher of the same faculty she graduated from.

Supported by a scholarship for women by GIZ and the TVET Programme, Tran excelled in her studies and even represented her college in national vocational skills competition. Her dedication paid off as she became a teacher at LILAMA 2, embracing the opportunity to inspire and guide her students.

Tran's story proves that alternative paths to university, like vocational education, could lead to equally fulfilling career opportunities and development.

ACTIVITY SNAPSHOTS
